

Operating instructions Power-Plug

Specifications:

Dimensions: 26mm X 44mm X 51mm

Input: AC 100-240V ~ 50 / 60Hz

Output: DC 5V 3.1A (15.5 Watt) Max

Using the charger:

The charger is meant for indoor use.

You can connect all types of USB devices to both USB ports. IQ technology ensures that both old and newer devices are charged in the most efficient way.

Comments:

Power-Plug has 2 smart USB-A ports. The total power of 15.5 watts is distributed over these 2 ports.

Depending on which 2 devices are connected, the power will be distributed so that the largest device also gets the most energy.

If you connect a device to one of the 2 ports, the total power (15.5 watts) is available for this device. Note: if you connect such a heavy device, use a USB cable certified for use up to 3.1A

Storage of the charger:

Do not store Power-Plug in damp rooms, the connections may oxidize.

Tip: The packaging is an ideal protection when storing your Power-Plug
